New Hand Fans

new

Sustainable, self-closing and almost indestructible - justfans not only makes modern and colorful folding fans, we have completely rethought the principle of fans. Produced in Germany with material sourced exclusively from the EU.

colorful

Cheerful, bright colors, opaque and translucent. Other shades available on request, made of recycled material, for instance from waste fished from the sea. For additional colors, please inquire about minimum quantities.

sustainable

Very good ecological balance, extremely(!) resilient, made of recycled or recyclable material Energy-efficient production with minimal packaging design and short transport routes. Awarded the "ethical style 2023 by ambiente".

light as a feather

Despite their minimal weight, all of our fans are amazingly robust and effective, making a lot of "wind" when fanning. With a total weight of just 27 grams, you can always have one in your pocket.

extraordinary

Innovative and completely new design. Our fans are made from one single material in a single piece, without a stick framework or unwieldy rivet. Classic folding fans reinterpreted.

integrated closing

From now on additional cases or covers are unnecessary. Thanks to the integrated closure, the fans can be safely stowed away. We have applied for a patent for this design solution.

durable

Our fans are extraordinarily durable and resilient. They are waterproof and unbreakable. Even oil, dirt or heat don't bother them much. The self-closing system provides extra protection in your bag.

customizable

If desired, the fans can also be printed in color or provided with a punch, e.g. with company and product logos. Please feel free to contact us about various options.

box of 50

For retail sales, we offer a box with 50 fans, sorted by color. The box is already filled and can be used as a counter display in stores.

individual colors

On request, we can also deliver fans in individually chosen colors. The minimum quantities vary depending on the shade. For logistical reasons, quantities of less than 100 fans are not possible.

special colors

We can also offer additional shades, special colors and - brand new - colors made from recycled materials. Depending on the market situation, larger minimum quantities may apply. Please do not hesitate to contact us with your special request.
